All claims pending thus being allowable, prosecution on the merits is closed in this application. A statement of the examiner's reasons for allowance is provided in the paragraphs, which follow below.

### **REASONS FOR ALLOWANCE**

Claims 1-13 are allowed.

The instant application is deemed to be directed to a nonobvious improvement over the invention of Berge et al (U.S. 6,369,954 B1), as being representative examples in the art to which the instant invention pertains. In particular, the primary reason for allowance is directed to the combination of an optical element comprising a chamber containing a first and second substantially immiscible fluids in contact over a meniscus extending transverse an optical axis and constrained by a side wall and having a second electrowetting electrode extending through the meniscus (Claim 1, lines 5-9 & 14-15; Claim 9, lines 5-9 & 14-15; Claim 12, lines 5-11 & 16-17; Claim 13, lines 5-12 & 16-17), which in the examiner's opinion, would not have been obvious to one of ordinary skill in the art.

The prior art taken either singly or in combination fails to anticipate or fairly suggest the limitations of applicant's independent claims, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The claimed invention is therefore considered to be in condition for allowance as being novel and nonobvious over prior art.
